

Time to Meet Your Match!

PANTONE 3 and PANTONE 5 Light Booths

Evaluating and approving color without the proper visual assessment tools is like identity theft – expensive, timely and credit damaging. Luckily, Pantone can strengthen your credibility by offering the perfect, controlled and consistent color evaluation environment – enabling you to make sure your colors always match!

Color can appear differently in various lighting environments and your customers most likely will have very specific requirements when approving samples. A metamerism effect is when two colors appear to match in one set of lighting conditions but fail to match in another – such as how two “matching” black socks might look the same inside your home but then differently when taken out into daylight. For optimum results, color evaluation should be examined and approved before reaching the retail market under a variety of lighting conditions – your testing area as well as outside, in a fluorescent-lit store, in the home or wherever else probable. Not only are our PANTONE 3 and PANTONE 5 Light Booths stylish and complementary to any work space, they also deliver consistently reliable daylight, store and home lighting options that will help you adequately identify color variations and metamerism effects early and save time and money from unnecessary approval rounds.

Choose from the following:

- Three- or five-light versions
- D65 or D50 daylight simulation lamps
- Cool White Fluorescent (CWF), TL84, U35 or U30 store lighting simulation lamps (U35 and U30 sold as individual lamps)

Item #	Description	Daylight D50	Daylight D65	Home A Tungsten	Whites UV	Store CWF	Store TL84
P5D65840	5 Lamp Booth – Option A		X	X	X	X	X
P5D50840	5 Lamp Booth – Option B	X		X	X	X	X
P3D65840	3 Lamp Booth – Option A		X	X			X
P3D50CWF	3 Lamp Booth – Option B	X		X		X	

Standard Features:

Also available:

Although high-quality and planned to last through one full year of constant usage, as expected, our lamps eventually will need to be replaced. Fortunately, we conveniently offer individual replacement lamps – all well-packaged to arrive safely and easy to self-install.

Item #	Description	Optimal Usage
L24D65	Dual* D65 replacement lamps (daylight – 6500K color temp)	Dedicated light source simulating north sky daylight; conforms to all important European and international regulations for visual color matching
L24D50	Dual* D50 replacement lamps (daylight – 5000K color temp)	Dedicated light source mainly for graphics, print and packaging applications – reproductions and color proofs
L24TL84	Single TL84 lamp (store – 4100K color temp)	Comparing samples within typical lighting for stores, offices, supermarkets and exhibition halls
L24U30	Single U30 lamp (store – 3000K color temp)	
L24U35	Single U35 lamp (store – 3500K color temp)	
L24CWF	Single Cool White Fluorescent lamp (store – 4100K color temp)	
L24CIEA	Dual* CIE “A” Tungsten Halogen lamps (home – 2700K color temp)	Comparing samples within typical “home” simulated lighting – also offices and hotels
L24UV	Single Ultraviolet lamp (Whites)	Required for textile or paper industries; stimulates optical brighteners, whitening agents, fluorescent pigments

*Lamps sold as pairs as booths require two of each to operate properly.
